PROFESSIONAL SUMMARY

Software engineering professional in training with internship experience in the financial sector, focused on data processing, integration and analysis using Python, SQL and Microsoft Fabric. Knowledge of application development, microservices architecture, REST APIs and continuous integration practices. Committed to developing scalable, maintainable solutions, with an interest in specializing in Data Science and Software Architecture.

PROFESSIONAL EXPERIENCE

Banco de Crédito del Perú (BCP)
Data Governance Intern
February 2026 – Present | Lima, Peru

- Develop solutions for data processing, integration and analysis using Python, SQL and Microsoft Fabric.
- Design and maintain data models, applying principles of information consistency, quality and traceability.
- Develop indicators and analyze information to support monitoring and decision-making.
- Implement structural and maintainability improvements in data solutions, using GitHub for version control.

BanBif — IT Service Desk Intern
2025-08 – 2026-01 | Lima, Peru | Hybrid

- Managed IT incidents and service requests through Aranda, providing user support and coordinating resolution and escalations.
- Assisted with user access and account administration and tracked technical support requests.
- Documented and validated operating procedures to support consistent service delivery and operational continuity.

Key achievements:

- Contributed to optimizing access management workflows, reducing manual rework.
- Helped standardize administrative IT processes, improving traceability and turnaround times.

TECHNICAL SKILLS

Workplace experience in data processing and governance; academic projects involving application development, architecture, APIs and CI/CD.

- **Data engineering and governance:** SQL, Python, notebooks, record loading and validation, Power Query, Microsoft Fabric, Dataflows and Lakehouse; academic/project exposure to MySQL and PostgreSQL.
- **Analysis and modeling:** indicator projection calculations, recurring reports, semantic models, Power BI and DAX.
- **Maintainability and traceability:** GitHub-versioned Power BI projects, descriptive snake_case naming and process documentation.
- **Software architecture and backend:** academic microservices projects, REST APIs, Spring Boot, .NET, Java, C# and OpenAPI/Swagger documentation.
- **Testing and continuous integration:** Postman, Selenium IDE, component testing, functional validation, Git, GitHub and CI/CD; foundational knowledge of Azure and Docker.
- **Additional technologies:** JavaScript, TypeScript, Angular, Vue.js, HTML and CSS; Android/Kotlin and Flutter/Dart through academic projects.
- **Delivery methods:** Scrum, Kanban and requirements analysis.

SELECTED ACADEMIC PROJECTS AND REPOSITORIES

SmartCampus | Academic management microservices | Angular, Java, Spring Boot, MySQL

School management solution with authentication, course and grading services. Contributed to academic microservices implementation and component testing.
Repository: https://github.com/SmartCampus-Grupo1-FundamentoArqui/lumina-smartcampus-backendV2

Veyra | Care coordination web platform | Angular, Java, Spring Boot, CI/CD

Connects elder-care facilities and families. Configured and documented continuous integration for automated builds and test validation.
Repository: https://github.com/upc-pre-1ASI0732-2610-16880-NovaTech/Veyra-Frontend-Application

Harmonix | Household finance web application | Vue.js, C#, .NET, MySQL

Helps households manage shared expenses. Contributed to information architecture, authentication, role-based dashboards, the HouseHold context and frontend/backend integration.
Repository: https://github.com/1ASI0730-2520-7432-G1-Harmonix/BackEnd

SpotFinder | Web and mobile parking platform | Angular, Spring Boot, Flutter

Connects drivers and parking-space owners with IoT integration. Contributed to functional design and performance and security requirements.
Repository: https://github.com/Emergentes-Trackmind/BackEnd-SpotFinder

NutriSend | Nutrition services web application | Angular, Java, Spring Boot, MySQL

Supports nutrition service management. Contributed to authentication, user profiles and subscription-based navigation.
Repository: https://github.com/Open-Source-SI729-2402-SV54/nutrisend-platform

Courtly | Sports booking mobile applications | Flutter, Dart, Android/Kotlin, Spring Boot

Supports court bookings and coaching sessions. Contributed to the Reviews and Coaches contexts and mobile training-related features.
Repository: https://github.com/UPC-1ACC0238-202610-3248-Courtly/courtly_mobile_app

EduSpace | Educational meetings web application | Vue.js, C#, .NET

Supports educational meeting organization. Developed form components, multiple selection and date/time handling.
Repository: https://github.com/FullStack-Fury/eduspace-frontend

EDUCATION

Universidad Peruana de Ciencias Aplicadas (UPC) — Software Engineering | In progress

Coursework in databases, software architecture, software quality, web and mobile development and agile project management.
